

What is Moodle?

Moodle provides web-based support for courses and programmes by bringing together a range of resources and tools into one location. The system allows for resources to be accessed at any time and from any place via the Internet. More information about Moodle can be found at moodle.org.

New learner Moodle website

We are pleased to announce the launch of the new learner Moodle website. The site was launched on 1st August 2010 and can be accessed at: www.nals.org.uk/learner.

The website has been re-launched with a vibrant new look, new content and new features including a calendar of events, RSS feeds, photo galleries, search functions and a dedicated news section.

We are encouraging tutors to have a Moodle course page to support your learning programme. By including your course on Moodle, you can enhance your learning with a range of learning activities that can increase your engagement with the subject.

Moodle enhances your learning experience beyond the classroom – by using course pages, your tutor can provide electronic handouts and resources in review of your classroom sessions as well as additional content to support your course including useful links, media and quizzes.

ePortfolios

The site also has a brand new ePortfolio system, which provides users with the tools to create and maintain a digital portfolio of their learning, and social networking features to allow users to interact with each other.

More information about the ePortfolio system can be found on the [ePortfolio information page](#).

Why use Moodle?

Moodle enhances your learning programme beyond the classroom.

Some key benefits include:

24/7 online access to important course information and material.

Additional learning tools, such as forums, wikis & quizzes.

Multimedia content including video & audio.

Discussion and support with other learners online.

ePortfolio feature to store and exhibit your work electronically
