Typically developing 3 - 6 month old child can ... 

- Make babbling sounds e.g. ba ba
- Recognises familiar voices
- By 6 months recognise familiar words that you use with actions e.g. “up”, “no”
- Makes a wider range of vocal sounds
- Making noises to gain your attention
- Smiling at around 5 - 6 weeks old
- Sticking out their tongue & move their lips when you speak to them
- Taking turns making sounds e.g. Child makes a noise, adult speaks and then child makes another sound
