

Consultation results

This form is for consultation team members to input results of a consultation which will then be published on the NCC website.

All fields marked with an asterisk * are mandatory.

What is the consultation title?*

Northamptonshire Local Flood Risk Management Strategy Update

What were the results?*

This consultation formed a key part in the process of developing the Northamptonshire Flood and Water Management Strategy. The initial consultation was undertaken with a small number of professionals to help shape the document and ensure that partners were supportive of the content, and these responses were all received as comments on the draft document. The public consultation was then published here.

In total, ten responses were received from our flood and water management partners and parish councils.

The main points raised by consultees related to minor wording changes, clarification on roles and responsibilities for flood risk management and the request to include an additional action to the action plan.

Following the conclusion of the consultation period, the Strategy and associated documents were approved by Cabinet on 9th November 2016. Please follow the link below to view the updated Northamptonshire Local Flood Risk Management Strategy, updated Action Plan and associated Cabinet reportage.

The Strategy and all associated documents, including the Communication, Engagement and Consultation report have been published on the 'Flood Toolkit' website, which can also be accessed from the link below. The Communication, Engagement and Consultation report includes an overview of all responses received and a bespoke response to each explaining how the comments were taken into consideration in the drafting of the final Strategy document. The Strategy will continue to be reviewed every three years and the action plan annually.
