

Some additional information that there was not a natural place for on the standard forms:

Parking

We sometimes park cars adjacent to the site on agricultural land used for tractors entering and exiting the farm. There are no designated spaces and I have not included them on the site plan.

Sewage

We use a septic tank and have it regularly emptied by a professional contractor. I can provide receipts if this would be of use.

Community Contributions

We have no cooking facilities on site, so our 14 employees are all shopping locally in the village every day. We have a great rapport with our neighbouring properties and offer discounts to all village residents.

We have completed free work for the community on several occasions and have been recognised for this in the Chronicle & Echo. We also partner with a local Northampton charity on a regular basis
