### 22. Industrial or Commercial Processes and Machinery

Please describe the activities and processes which would be carried out on the site and the end products including plant, ventilation or air conditioning. Please include the type of machinery which may be installed on site:

The canopy will cover existing REDOX processing equipment already operating on site to sort and process waste material. The extension to the DWES building, along with the existing building, will accommodate modern materials recycling plant. It will comprise a tipping hall to feed a shredder and separators and weighscale system. Oversize material and rejects will be returned to the tipping hall for process elsewhere. All other material will pass through two trommels, air separators and pellenc optical sorting units. It will be sorted into 5 material lines (light, mid light, mixed plastics, heavy and fines fraction). The light, mid light and mixed plastics lines will hand sorted within a main sorting cabin. The material outputs will be baled for storage and subsequent removal off site. Rejects from the main sorting cabin will be returned to the tipping hall and remove off site.

The process is illustrated in Drawing GPP/SWM/KT/10/06.
