5th August 2011

Storefield Field Lodge Waste Management Park,
Rushton

i) Variation of Conditions 11, 21 and 22 of Consent No 08/00101/WAS

ii) Variation of Condition 12 and 22 of Consent No 09/00018/WAS

iii) Variation of Condition 3 and 13 of Consent No 10/00004/WAS

A concurrent planning application is being submitted to extend the Storefield Lodge landfill facility to the north and continue operations at the site until 2030. To provide consistency between various extant consents at the site in respect of such operations as bio-remediation and waste recycling, a separate application is being submitted to vary conditions of three separate planning consents at the site as follows.

i) Variation of Conditions 11, 21 and 22 of Consent No 08/00101/WAS

Consent No 08/00101/WAS was granted on 4th March 2009 and that sought to vary the restoration contours and end date of the primary development. Consent is now being sought to vary Condition No 11 relating to a further revision to the restoration profile to blend the existing site contours with the proposed northern extension. The new profile is shown on the attached Drg No R14/11/801 Rev A, which is identical to Drg No R14/10/604 (contained within the recently submitted Environmental Statement) with the exception of the location of the “red-line.” Accordingly, we request Condition No 11 is amended as follows:

“The final landform/contours following the completion of tipping and restoration, including the engineered clay cap and replaced soil profile within the area subject to this planning permission, shall be as shown on Drawing No R14/11/801 Rev A.”

Condition No 21 relates to timescales and subject to the northern extension being approved then consent is being sought to vary the condition as follows:

“The waste disposal and clay extraction development hereby permitted shall cease not later than 30th September 2030 (twenty hundred and thirty) and the site shall be restored or reinstated in accordance with the conditions of this permission upon cessation of tipping operation or by the date stated, which ever is sooner, and the site shall be left in a clean and tidy condition.”
**Condition No 22** relates to the source of the material and consent is being sought to vary the condition as follows:

“Unless otherwise expressly approved in writing by the Waste Planning Authority all inert waste material to be deposited at the site shall originate from sources within a 20 miles radius of the site and 95% of all other waste materials to be deposited at the site shall originate from sources within a 30 mile radius.”

The extant condition limits the catchment area of imported industrial, commercial and domestic waste to a 30 mile radius from the site (and 20 miles for inert material) unless otherwise approved in writing. Now the recycling building is operational on site the Company is starting to receive more enquiries from companies wishing to use the Storefield Lodge facility outside the 30 mile catchment zone. Whilst the site at Rushton is not unique, it probably represents only a very limited number all landfill sites in England which offer an on-site waste pre-treatment facility.

Mick George Ltd operate a fleet of over 85 HGV’s hauling both minerals and waste to and from a variety of locations and with such activities this provides the opportunity to back-haul materials ensuring vehicles do not unnecessarily travel empty on the public highway. As it would appear such enquiries to import material from outwith the catchment zone are likely to increase and invariably such requests are at very short notice then, rather than rely on the prior written approval of the WPA the above revision is proposed.

This will not undermine the principles of policies within the County’s Minerals and Waste Development Framework nor the primary objectives of the National Waste Strategy for England (2007). The facility at Storefield Lodge has sought to enshrine the stated objectives of the Waste Strategy by investing and incentivising efforts to reduce, re-use and recycle various types of waste by stimulating investment in recycling and recovery.

**ii) Variation of Condition 12 and 22 of Consent No 09/00018/WAS**

Consent No 09/00018/WAS relates to the establishment of green-waste composting, bio-remediation, mineral extraction and the importation of additional non-hazardous waste and was approved on the 15th June 2009 and **Condition No 22** of that consent limited development to the 30th September 2017. For consistency, consent is sought to vary the above condition requiring the development to be completed by 30th September 2030.

Consent is also being sought to vary **Condition No 12** relating to a further revision to the restoration profile of the consent area to blend with the existing site contours to the south and those of the proposed northern extension. The new profile is show on the attached Drg N° R14/11/901 which is identical to Drg N° R14/11/801 Rev A and Drg N° R14/10/604 referred to above with the exception of the location of the red line. The proposed wording of condition 12 is requested to read as follows:

“The final landform/contours following the completion of tipping and restoration, including the engineered cap and replacement soil profile within the area subject to this planning permission, shall be as shown on Drawing R14/11/901.”

**iii) Variation of Condition 3 and 13 of Consent No 10/00004/WAS**

**Condition No 3** of the Waste Recycling Consent N° 10/00004/WAS also limits hours of working, we are seeking to vary this condition to read:

“Except as may otherwise be agreed in writing by the Waste Planning Authority, site operations and any associated activities shall only be carried out between the hours of 07:00 and 18:00 Mondays to Fridays and 07:00 and 13:00 on Saturdays. During the hours of 13:00hrs...
and 16:00hrs on Saturday’s deliveries only of non-hazardous waste material are permitted but there shall be no processing of waste materials or any other associated activities. In addition up to 20 HGVs may deposit material within the waste recycling building between 0800hrs and 1600hrs on Sundays and Bank Holidays, but there shall be no processing of waste materials or any other associated activities.”

The above operational hours are slightly increased from those currently permitted on site and this is to enable material to be brought to the waste recycling facility (but not processed or landfilled) on Sundays and Bank Holidays. There will be a limited number of HGV’s involved and this will enable material to be collected from local facilities generating waste 7 days per week. This may include waste for instance from municipal waste receptor facilities recovering a variety of waste from the general public.

**Condition No 13** of Consent No 10/00004/WAS limited the Waste Recycling operations to the identical date of 30th September 2017 and again consent is being sought to vary this date to 30th September 2030.

As separate Design and Access Statement has been prepared and this reflects the detail contained at 1.3 of the Environmental Statement, recently submitted.

As noted above, an application has been submitted for a northern extension to the Storefield Lodge Waste Management Park facility and that application is accompanied by an Environmental Statement, which among other issues addresses the ongoing site operations on the current site. We trust the enclosed applications and supporting detail is sufficient for the applications to be processed but should you require clarification of any issue then kindly advise accordingly.

Yours Sincerely

**Planning Manager**

Application pro-forma (x3)

Design and Access Statement
Drg No R14/11/801 Rev A (Ref Conditions 11, 21 and 22 of Consent No 08/00101/WAS)
Drg No R14/11/901 (Ref Condition 12 and 22 of Consent No 09/00018/WAS)
Drg No R14/102 (Ref Condition 3 and 13 of Consent No 10/00004/WAS)
Design and Access Statement

In accordance with the requirements of Circular 01/2006, a design statement has been prepared in connection with the proposed variation of conditions at the Storefield Lodge Waste Management Park (Rushton Landfill Site), Oakley Road, that examines the following design principles although, it should be noted that no built structures are proposed as part of the planning application:

- site context and use;
- layout and scale; and
- landscaping and appearance.

Details of the proposals are set out within this Environmental and Supporting Statement and the location and site context are produced on Drg No’s R14/10/601, R14/10/603 and R14/10/604 and described within the landscape and visual appraisal prepared by Crestwood Environmental. The proposed development is located immediately north of the established Rushton Landfill Site off Oakley Road, Rushton, Northamptonshire, and currently comprises a partially restored landfill site, which in itself sought to restore former mineral workings. In November 2008, consent was granted to enable recycling operations to be undertaken on the site and in 2009 a reprofiling scheme for the southern and eastern aspects of the landfill site were approved.

In respect of the layout and scale, Drg No R14/10/603 details the proposed areas, both of which are accessed by existing internal haul routes through the landfill site and the existing access point onto Oakley Road, which provides adequate turning circles and manoeuvring facility of heavy goods vehicles (including articulated vehicles) that will be used in part to deliver suitable material to restore the area. On site limestone is used to construct and maintain the haulage routes for all year round access. A wheel-cleaning facility incorporating a wheel bath and separate wheel-wash is provided on the site and was upgraded in 2010 to ensure that heavy goods vehicles leaving the area do so in a clean state before exiting onto the public highway.

With regard to landscaping and appearance, the proposed northern extension will generally be screened by an area of tree planting established on recontoured land to the north of the proposed diversion of Storefield Brook. Cross sections included within the Environmental Statement demonstrate the efficiency of this screening.

The site will be restored to the typical character of the locality with hedgerows delineating agricultural fields combined with broadleaf woodlands. Part of the eastern woodland is shown as carr woodland, in association with surface water pond features. Peripheral areas along the southern boundary will be reinstated to productive arable land and combined with adjacent arable fields. New broadleaf woodland is proposed to the north-west of the site, which will assist in screening site operations in the interim period.

Drawing No. R14/10/604 shows the restoration proposals for the additional landfill area, watercourse diversion and adjacent landscape works integrated with the approved restoration scheme. The Proposed Restoration Masterplan has been drawn up in response to the findings of the Landscape and Visual Impact Assessment undertaken for the proposed extension drawing on the
information provided in landscape character assessments. Biodiversity Action Plan targets and landscape policies applicable to the site.

**Access Statement**

The proposed development is an extension to the established landfill facility with established infrastructure and adequate access provisions onto the public highway. Furthermore, the proposals seek to recover a limited volume of limestone whilst additionally optimising on the non-hazardous waste capacity within the existing Rushton Landfill site restoring an area of former quarry workings that does not appear to have such a requirement. As noted above, the existing site benefits from its own purpose-built access onto the public highway and associated infrastructure, including a weighbridge and wheel-wash facility.

In order that the operations on site can be fully managed, it is envisaged that the existing traffic management system will be retained and modified as appropriate to incorporate the vehicle movements associated with the re-contouring operations. This will involve the partial segregation of HGVs from other vehicles on site. The public will not be allowed to access the area for health and safety reasons.

Part I - Particulars of application

Date of Application
Received – 8th January 2010
Valid – 15th January 2010

Application No.:
NCC – 10/00004/WAS
KBC – KET/2010/0039/NCC

Particulars and location of development
Variation of condition 14 of planning permission 08/00069/WAS to vary the end date of waste recycling operations at Storefield Lodge Landfill Site, Oakley Road, Rushton, Kettering NN14 1RS

Part II - Particulars of decision:

The Northamptonshire County Council

Hereby give notice in pursuance of the provisions of the Town and Country Planning Act 1990 that permission has been granted for the carrying out of the development referred to in Part I hereof in accordance with the application and plans submitted subject to the following conditions:-

Time Limit

1. The development to which this relates must be begun not later than the expiration of three years beginning with the date of this permission.

Reason: To conform with the requirements of Section 91 of the Town and Country Planning Act as amended by the Planning and Compulsory Purchase Act 2004.

Note: This permission only relates to planning permission and does not include consent under the Building Regulations for which separate permission may be required. The requirements of the Chronically Sick and Disabled Persons Act 1970, the Disability Discrimination Act 1995 and the Special Education Needs and Disability Act 2001 should also be adhered to wherever appropriate.
Scope of Permission

2. Except as otherwise required by conditions attached to this planning permission the development hereby permitted shall be carried out in accordance with the submitted application, i.e. Application Form, dated 8th January 2010; Design and Access Statement, dated January 2010; Drawing No. R14/101 – Location Plan Proposed Waste Recycling Facility; Drawing No. R14/102 – Site Plan, and Drawing No. R14/104 Illustrative Section Proposed Waste Recycling Facility.

Reason: To define the scope of the permission and in the interest of clarity.

Hours of Working

3. Except as may otherwise be agreed in writing by the Waste Planning Authority, site operations and any associated activities shall only be carried out between the hours of 07:00 and 18:00 Mondays to Fridays and 07:00 and 13:00 on Saturdays. During the hours of 13:00 and 17:00 on Saturdays deliveries only of non-hazardous waste material are permitted but there shall be no processing of waste materials or any other associated activities. No operations whatsoever shall be carried out on the site on Sundays, Public or Bank Holidays.

Reason: To ensure that working on site is carried out within reasonable hours so as to avoid disturbance to nearby residential properties and in accordance with Policy 15 of Northamptonshire Waste Local Plan (2006).

Dust

4. Suitable measures shall be adopted to ensure dust is kept to a minimum including the use of water spray facilities in periods of dry weather.

Reason: To protect the interests of local amenity in accordance with Policy 15 of Northamptonshire Waste Local Plan (2006).

Stockpile Heights

5. All stockpiles of either imported inert waste or processed inert waste shall, at no times, exceed 5 metres in height.

Reason: To protect the interests of local amenity in accordance with Policy 15 of Northamptonshire Waste Local Plan (2006).

Note: This permission only relates to planning permission and does not include consent under the Building Regulations for which separate permission may be required. The requirements of the Chronically Sick and Disabled Persons Act 1970, the Disability Discrimination Act 1995 and the Special Education Needs and Disability Act 2001 should also be adhered to wherever appropriate.
Noise

6. All plant and machinery shall be noise attenuated and noise generated from operations on the site shall not exceed 55db(A) $L_{eq}$ 1 hr free field at the nearest noise sensitive properties.

**Reason:** To protect the interests of local amenity in accordance with Policy 15 of Northamptonshire Waste Local Plan (2006).

Site Access, Lorry Routing, Wheel Cleaning and Vehicle Sheeting

7. The sole vehicular access in association with the development hereby permitted shall be the existing access onto the Oakley Road and this access shall be maintained. And all HGV traffic shall arrive at the site and leave the site to and from the A6003 Road only and shall not travel through the village of Rushton. (See informative 1 at the end of this permission)

**Reason:** In the interests of highway safety and local amenity in accordance with Policies 8 and 15 of the Northamptonshire Waste Local Plan (2006).

8. All operational vehicles leaving the site shall be cleansed of mud and other debris to ensure that no mud or debris is deposited on the public highway.

**Reason:** In the interests of highway safety and local amenity in accordance with Policies 8 and 15 of the Northamptonshire Waste Local Plan (2006).

9. All operational vehicles arriving at and leaving the site shall be sheeted to prevent material spillage or wind blow.

**Reason:** In the interests of highway safety and local amenity in accordance with Policies 8 and 15 of the Northamptonshire Waste Local Plan (2006).

Contaminated Land/Risk Assessment

10. The approved Contaminated Land/Risk Assessment (approved on 14th January 2009) shall thereafter be implemented.

**Reason:** In order to ensure that measures are put in place to adequately address the possibility of contamination of the site and adjoining land, and in compliance with the advice contained within PPS23 Planning and Pollution Control (2004) and Policy 13 of the Northamptonshire Waste Local Plan (2006).

**Note:** This permission only relates to planning permission and does not include consent under the Building Regulations for which separate permission may be required. The requirements of the Chronically Sick and Disabled Persons Act 1970, the Disability Discrimination Act 1995 and the Special Education Needs and Disability Act 2001 should also be adhered to wherever appropriate.
11. If, during development, contamination not previously identified is found to be present at the site then no further development (unless otherwise agreed in writing by the Waste Planning Authority) shall be carried out until the developer has submitted, and obtained written approval from the Waste Planning Authority for, an amendment to the remediation strategy detailing how this unsuspected contamination shall be dealt with.

**Reason:** To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be safely carried out without unacceptable risks to workers, neighbours and other offsite receptors in accordance with Policy 13 of the Northamptonshire Waste Local Plan (2006).

**Surface Water Drainage/Groundwater**

12. Piling or any other foundation designs using penetrative methods shall not be permitted other than with the express consent of the Waste Planning Authority, which may be given for those parts of the site where it has been demonstrated that there is no resultant unacceptable risk to controlled waters. The development shall be carried out in accordance with the approved details.

**Reason:** To ensure that a pathway for any potential contamination is not made to the underlying strata and to ensure that landfill liners or caps are not put at risk from foundation works in accordance with Policy 13 of Northamptonshire Waste Local Plan (2006).

**End Date**

13. The development hereby permitted shall cease no later than 30th September 2017 (twenty hundred and seventeen) by which time the recycling building shall be dismantled, foundations and hard standings removed and the site shall be restored or reinstated in accordance with the conditions attached to planning permission KE/89/0791.

**Reason:** To retain control over the development and in the interests of visual amenity and to ensure that the development does not prejudice the overall restoration of the landfill site in accordance with Policy 16 of Northamptonshire Waste Local Plan (2006).

**Note:** This permission only relates to planning permission and does not include consent under the Building Regulations for which separate permission may be required. The requirements of the Chronically Sick and Disabled Persons Act 1970, the Disability Discrimination Act 1995 and the Special Education Needs and Disability Act 2001 should also be adhered to wherever appropriate.
Monitoring

14. The operators of the site shall at a minimum of 12 monthly intervals provide in writing to, and upon request by the Waste Planning Authority, detailed information on the quantities and types of all waste materials brought onto the site for re-use, recovery and sent for. Such information will only be used in aggregated format as part of an Annual Monitoring Report produced by the Waste Planning Authority.

**Reason:** To enable the Waste Planning Authority to monitor progress towards achieving the principles in Policy 1 of the Northamptonshire Waste Local Plan (2006) and the objectives of the National Waste Strategy for England 2007.

15. The operating company shall keep records of the quantity of waste received by weight and its source and these records shall be provided to the Waste Planning Authority within seven days of written request. All such information supplied will be treated on a confidential basis.

**Reason:** To enable the Waste Planning Authority to monitor progress towards achieving the principles in Policy 1 of the Northamptonshire Waste Local Plan (2006) and the objectives of the National Waste Strategy for England 2007.

16. A copy of the terms of this planning permission, including all documents hereby permitted and any documents subsequently approved in accordance with this permission (or amendments approved pursuant to this permission) shall be displayed at the site office and shall be made known to any person given responsibility for the management or control of operations on the site.

**Reason:** To monitor the implementation of the conditions.

INFORMATIVE

1. All vehicles in association with the development hereby permitted shall be routed in accordance with the legal agreement under Section 106 of the Town and Country Planning Act 1990 and Section 33 of the Local Government (Miscellaneous Provisions) Act 1992 (dated 29th April 1991) between Northamptonshire County Council, Cook Lubbock and Co and Cleansing Services (Rushton) Group; i.e. all lorry traffic shall arrive at and leave the site to and from the A6003 road only and shall not travel through the village of Rushton.

**Note:** This permission only relates to planning permission and does not include consent under the Building Regulations for which separate permission may be required. The requirements of the Chronically Sick and Disabled Persons Act 1970, the Disability Discrimination Act 1995 and the Special Education Needs and Disability Act 2001 should also be adhered to wherever appropriate.
REASONS FOR APPROVAL

The proposal, as amended, is to extend the end date of the waste recycling facility at Rushton Lodge Landfill Site from 30th April 2013 (as specified in condition 14 of Permission Ref. 08/00069/WAS) to 30th September 2017 to be consistent with the permitted end date of the main landfill development.

Rushton Landfill Site is identified in the Northamptonshire Waste Local Plan (2006) as a main site for waste management facilities. Policy 2 deals with the location of waste development and states a positive presumption in favour of waste management facilities being permitted at existing “main sites” such as the Rushton Landfill Site. Given that the proposal is to extend the life of an existing waste recycling facility, the principle of its use is acceptable in accordance with Policy 2 of the Northamptonshire Waste Local Plan (2006). All other aspects of the development remain unchanged from the existing arrangements. Potential local amenity issues have been considered and the proposal is considered acceptable in accordance with Policy 15 of the Northamptonshire Waste Local Plan (2006).

Date: 14th April 2010

Signed ........................................

For Chief Planning Officer

Note: This permission only relates to planning permission and does not include consent under the Building Regulations for which separate permission may be required. The requirements of the Chronically Sick and Disabled Persons Act 1970, the Disability Discrimination Act 1995 and the Special Education Needs and Disability Act 2001 should also be adhered to wherever appropriate.
1. If the applicant is aggrieved by the decision of the local planning authority to refuse permission or approval for the proposed development, or the grant permission or approval subject to conditions, he may appeal to the Secretary of State for the Environment in accordance with Sections 78 and 79 of the Town and Country Planning Act 1990 within six months of receipt of this notice. (Appeals must be made on a form which is obtainable from the Planning Inspectorate, 3/08a Kite Wing, Temple Quay House, 2 The Square, Temple Quay, Bristol, BS1 6PN). The Secretary of State has power to allow a longer period for the giving of a notice of appeal but he will not normally be prepared to exercise this power unless there are special circumstances which excuse the delay in giving notice of appeal. The Secretary of State is not required to entertain an appeal if it appears to him that permission for the proposed development could not have been granted by the local planning authority, or could not have been so granted otherwise than subject to the conditions imposed by them having regard to the statutory requirements (a), to the provisions of the development order, and to any direction given under the order. He does not in practice refuse to entertain appeals solely because the decision of the local planning authority was based on a direction given by him.

2. If permission to develop land is refused or granted subject to conditions, whether by the local planning authority or by the Secretary of State for the Environment and the owner of the land claims that the land has become incapable of reasonably beneficial use in its existing state and cannot be rendered capable of reasonably beneficial use by carrying out of any development which has been or would be permitted he may serve on the Council of the district in which the land is situated a purchase notice requiring that council to purchase his interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

3. In certain circumstances, a claim may be made against the local planning authority for compensation, where permission is refused or granted subject to conditions by the Secretary of State on appeal or on a reference of the application to him. The circumstances in which such compensation is payable are set out in Section 114 of the Town and Country Planning Act 1990.

(a) The statutory requirements are those set out in Section 79(6) of the Town and Country Planning Act 1990, namely sections 70 and 72(1) of the Act.

Note: This permission only relates to planning permission and does not include consent under the Building Regulations for which separate permission may be required. The requirements of the Chronically Sick and Disabled Persons Act 1970, the Disability Discrimination Act 1995 and the Special Education Needs and Disability Act 2001 should also be adhered to wherever appropriate.
