Subject: RE: 20/00018/WASVOC - Stonehill Quarry

Helen,

With regard to any anticipated questions about HGV movements, as you are aware there is no planning restriction imposed on daily movements but from commencement of the current scheme (i.e. from January 2018) the average daily figure is in the region of 32 loads (64 movements) which I recall is generally in line with that indicated in the original planning application.

We would envisage that on average there could be up to 10 loads per day of additional HGV's carrying material that could be recycled which would typically equate to a single additional load per hour (or two HGV movements). Any recycled aggregate dispatched from the site would be carried on a vehicle that would otherwise leave the site empty.

I trust this assists.

Kind regards

John Gough
