8<sup>th</sup> January 2018

Dear Mr Szymanski

## **Former Astwick Quarry, Croughton, Northants, NN13 5LL**

**Planning Permission No: NCC Ref. 16/00043/WASFUL  
SNC Ref. S/2016/2649**

Further to our recent conversations, we would like to apply for a Non-Material Amendment to the above planning permission. A cheque for the sum of £195.00 is being sent to you by post to cover the fee.

The company would like to commence de-watering of the main waterbody. However, in order to do this, we need to import materials to allow us to undertake the installation. Due to the fact that the ownership of the lake has changed we have lost the access route used during the previous approved developments. For this reason it is necessary to construct a small access track to the waterbody in order to install the pump.

We estimate 50 to 60, 8-wheeler loads of Brash/Hardcore will need to be imported to form a new access track to position the pump and auxiliary equipment. The track would be approximately 3 metres wide (a vehicle width) and approximately 130m in length along the shortest route to the required location. The route has been chosen to avoid the most ecologically sensitive areas of the site, as informed by previous ecological surveys, given it will be along the previously infilled area.

We would expect the works to take 2-3 weeks, weather dependent. No further operations are proposed until the outstanding pre-commencement planning conditions have been discharged.

Please see attached Method Statement already submitted to the Bedford Group of Drainage Board for a discharge consent. It is expected that this will be issued within 4 weeks of the application and can be submitted to the Waste Planning Authority for peace of mind. The pump will be a Selwood 6" Pump. Please note that it is only proposed to undertake the works and operate the pump within operational hours.

The following attachments are included with the application:

- Attachment 1 – Method Statement
- Attachment 2 - Plan

We look forward to the application being validated and a positive outcome, in due course.

Yours Sincerely

Karen Henson
