RECOMMENDED INDUSTRY GUIDANCE – RESTORATION, AFTER-CARE AND AFTER-USE OF MINERALS AND WASTE DEVELOPMENT

The following industry code and protocols are recommended as guidance for Minerals and Waste Development:

- Department of Communities and Local Government (CLG) (March 2010) Planning Policy Statement 25, Development and Flood Risk;
- DEFRA (2004) Optimising the efficiency of recharge features as a mechanism for mitigating the impacts of quarry dewatering;
- English Nature, Quarry Products Association and Silica and Moulding Sands Association (2003) Geodiversity and the minerals industry – Conserving our geological heritage;
- English Nature, Quarry Products Association and Silica and Moulding Sands Association (1999) Biodiversity and minerals – Extracting the benefits for wildlife;
- Mineral Products Association (2011) Building on our legacy...realising our potential. The MPA biodiversity strategy.
- RNRP (2006) Biodiversity character assessment
- RNRP (2006) Environmental characterisation process;
- White, GJ and Gilbert JC (eds) (2003) Habitat creation handbook for the minerals industry. RSPB;
- Wildlife Trust (2005) Wetland restoration manual; and
