

## What is a Falls Pendant?

The Falls Detector is a pendant worn discreetly around your neck and is designed specifically for individuals prone to falls. When activated the Lifeline unit is triggered alerting the monitoring control centre who communicate with the emergency contacts. The Lifeline alert can also be activated manually by pressing the button on the pendant.

## What is a Lifeline?

A lifeline is a central hub unit situated within the home. This can be linked to various equipment, such as pendants, fall and smoke detectors. When the equipment is activated, the lifeline unit sends an alert to the monitoring call centre which will contact either the emergency services or emergency contacts and remain in contact until help arrives.

### Your Safety. Your Lifeline

We will fully install your Lifeline for **FREE!** After installation you pay just **£4 a week** for as long as you receive the service.

### Tiny Box. Huge Help.

The lifeline unit connects with various pieces of equipment such as pendants, fall detectors and smoke detectors.
